	(k) Refined sugar production and month-end stocks	33

MARKET REVIEW

On June 5 the Department declared a further deficit of 100,000 tons in the sugar quota of Puerto Rico and reallocated an equivalent quantity to western hemisphere quota countries which have additional sugar available for exportation. The details of this action are described in press release reproduced herein beginning on page 6.

Inventories of raw and refined sugar reported on hand by all primary distributors on May 31 totaled 2,614,000 short tons, raw value, according to preliminary reports. This was 292,000 tons more than a year earlier but about 83,000 tons less than on April 30, 1969. Cane sugar refiners' stocks totaled 970,000 tons, or about 76,000 tons more than on May 31 last year and about 90,000 tons more than a month earlier. Beet processors' stocks of 1,355,000 tons were about 253,000 tons more than on the same date last year and 131,000 tons less than at the end of April 1969.

Sales of sugar by primary distributors for U.S. consumption through June 14 were reported as 4,392,000 short tons, raw value, compared with 4,465,000 tons during the same period last year. Cane sugar refiners distributed 3,090,000 tons, or 70 percent of the total this year compared with 3,268,000 tons, or 73 percent last year. Beet sugar sales were reported as 1,222,000 tons or 28 percent of the total compared with 1,094,000 tons, or 25 percent for the comparable period last year.

Regionally, refined sugar deliveries during the period January - April 1969 were 3.3 percent less than during the same period last year. Decreases occurred in three of the five regions with the North Central region down the most -- 6.3 percent, followed by the West, down 6.1 percent and the mid-Atlantic region down 2.8 percent. Regions with increases were New England, up 3.3 percent and the South, up 0.2 percent.

Individually, 29 states received less sugar in the first four months of 1969 than in those months of 1968, 18 received more sugar, and three about the same. Illinois and California had the largest decreases, down 965,000 and 519,000 hundredweight, respectively, while Florida and Georgia were the only states with increases of more than 100,000 hundredweight.

By types of users, the year to year changes in deliveries were also marked. During the first quarter, industrial non-food products manufacturers received 12 percent more sugar, canners and preservers as well as hotels, restaurants and institutions about five percent more, while retail grocers received about 11 percent less, confectioners about eight percent less, and bakers about five percent less. Changes in deliveries to other major categories of industrial and non-industrial users were less significant. First quarter 1969 deliveries to industrial buyers as a group were below those of 1968 by about 3.5 percent and to non-industrial type buyers were lower by 5.4 percent.

Deliveries of liquid sugar, both beet and cane, were larger during January-March 1969 than during these months of 1968. Liquid cane sugar deliveries were larger in 1969 to six of the seven industrial and three of the four non-industrial type users, while liquid beet sugar deliveries were larger to four industrial and two non-industrial type users.

Deliveries of refined sugar in consumer-size packages (less than 50 pounds) were smaller during the first quarter of 1969 than in the comparable quarter of 1968. Deliveries of both beet and cane sugar in consumer-size packages were down reflecting the decline in sugar deliveries to retail stores discussed earlier. First quarter 1969 deliveries of sugar in bulk were less than in the first quarter of 1968- an increase of four percent in the deliveries of bulk beet sugar was more than offset by an 11 percent decline in the deliveries of bulk cane sugar. Dextrose deliveries declined 0.5 percent from the first quarter of last year.

Since the last issue there have been several announcements of price changes affecting the wholesale price of sugar in the several geographic regions. On May 15, a cane sugar refiner announced that in the California, Reno and Las Vegas, Nevada sales territory the allowance of .15 cent per pound on sales of industrial products would be terminated at the end of June and that starting July 1 all industrial products would be invoiced at the quoted price of 10.25 cents per pound. On June 7, a cane sugar refiner announced that quoted prices for industrial sugar products in the Gulf sales territory would be advanced .10 cent per pound, from 10.65 cents to 10.75 cents, effective close of business June 27. The announcement noted, however, that contracts for shipment during the period June 28 through August 8 would be considered at 10.40 cents per pound, and for shipment

during the period August 11 through September 30 at 10.50 cents, provided such contracts are submitted by close of business June 27.

A cane sugar refiner announced on June 9 that effective close of business June 27 in the Chicago-West sales territory the direct shipping allowance of .10 cent per pound would be withdrawn. Other sellers followed with similar announcements. As of June 20 the following were the quotations for refined sugar sold in the basis pack-100 pound paper bags:

	Cane	Beet
	Cents per pound in 100 lb. paper bags	
Northeast	11.50	
Southeast	10.85	
Gulf	10.75	
Eastern beet		10.50
Chicago-west	10.50	10.50
Direct shipment territory	10.40	10.40
Lower Pacific Coast	10.10	10.10
Northwest intermountain	10.15	10.15

The U. S. average retail price for refined sugar sold in 5-pound paper bags during April was 12.30 cents per pound, up from 12.28 cents in March and 12.18 cents in April of last year. For the period January-April 1969 the retail price averaged 12.24 cents per pound compared with 12.15 cents during the same period last year.

The spot price for raw sugar, duty paid and delivered to New York, as reported on the New York Coffee and Sugar Exchange averaged 7.82 cents per pound during May, compared with 7.80 cents during April and 7.48 cents during May of last year. For the first five months of 1969, the spot price averaged 7.75 cents per pound compared with 7.41 cents during January-May, 1968. From April 24 through June 10, the quotation was 7.82 cents per pound and on June 11 declined to 7.75 cents. On June 20 the quotation was 7.75 cents per pound and for the period June 1-20 averaged 7.78 cents compared with 7.51 cents per pound during this period last year.

Production of cane sugar in Puerto Rico continues to lag. Extraordinarily rainy weather during harvest has resulted in trashy cane which has reduced the yield of sugar per ton of cane. Through June 8,

sugar production totaled 439,000 tons, 96° basis compared with 606,000 tons during the comparable period last year. The yield of sugar per ton of cane this year has averaged 8.469 percent, compared with 9.784 percent for the same period last year. Present indications are that considerable quantities of cane originally scheduled for harvest this year will be carried over and harvested as part of next year's crop.

In Hawaii, the sugarcane harvest was interrupted by a strike which closed 23 of the sugar plantations for 30 days, during February and March. Production through June 7 totaled 384,000 tons, 96° basis, compared with 467,000 tons through the comparable date last year. Some gains in production were made on the last year's rate during the past month. Present harvesting schedules indicate an accelerated rate during the balance of the year so that most of the lag should be made up by year-end.

The spot quotation for World sugar f.o.b. and stowed at Greater Caribbean ports, including Brazil, as established by the Spot Committee of the New York Coffee and Sugar Exchange, averaged 3.78 cents per pound during May compared with 1.98 cents during May of last year and 3.48 cents per pound for the first five months of 1969. During the same months last year the quotation averaged 2.02 cents per pound. On June 2, the quotation was 3.90 cents, declined to 3.80 cents on June 3, rose to 4.08 cents on June 13, a high for the year, after which the quotation declined to 4.05 cents on June 17 and to 4.00 cents per pound on June 19. On June 20 the price of world sugar was quoted as 4.00 cents per pound and for the period June 1-20 averaged 3.97 cents, compared with 1.77 cents for the same period last year. On June 20, futures contracts for World sugar quoted on the New York Coffee and Sugar Exchange ranged from 3.95 cents per pound for March or May 1970 delivery to 4.06/07 cents for September 1969 delivery. The current trading month has been several points higher than the next several succeeding months since May 14 and has exceeded all of the succeeding trading months since June 16.

Reports from Europe indicate that yields of sugarbeets this year from about the same acreage as last year are not likely to be higher than last year. It would appear that the usual annual world increase in consumption for the 1969-70 crop year will have to come from larger sugarcane crops or from some depletion of sugar inventories.

ADMINISTRATIVE ACTIONS RELATING TO 1969 SUGAR SUPPLIES

Puerto Rican Sugar Deficit Reallocated:

The United States Department of Agriculture on June 5, 1969, declared an additional deficit of 100,000 tons in the sugar quota for Puerto Rico.

Together with earlier determined quantities of 700,000 tons, the deficit in the 1969 quota for Puerto Rico now amounts to 800,000 tons. The harvesting season in Puerto Rico continues to be marked by extraordinarily rainy weather. This condition has not only impeded the cutting of sugarcane, but has caused the cut sugarcane to be trashy, which has reduced the yields of sugar per ton of cane. Harvesting is expected to continue for some time and it may be that Puerto Rico will be able to ship to the mainland more than the tonnage which now remains in its adjusted quota. In that event, despite today's action, Puerto Rico retains the right to market whatever sugar it is able to ship.

The President determined on May 23, 1969, under Section 204 of the Sugar Act that it would be in the national interest to assign to the Dominican Republic a special allocation of 50,000 short tons, raw value, of the sugar needed to replace deficits in the quotas of other areas and its pro rata share of the balance of such deficits.

The President's decision was taken in accordance with the recommendation of the Conference Report on the Sugar Act Amendments of 1965 that he use his authority to assign deficits to provide additional quota for the Dominican Republic if the political situation in that republic warrants such action.

As in the case of the Republic of the Philippines and Peru, information available to the Department indicates that Haiti will not be able to produce sufficient sugar to market more than its present quota. Accordingly, none of the deficit declared in this action has been allocated to those countries.

After the assignment of 50,000 tons of the Puerto Rican deficit declared herein to the Dominican Republic, the balance of the deficit of 50,000 tons was prorated to the Dominican Republic and the other eligible Western hemisphere countries named in Section 202(c)(3) (A) of the Act, other than Peru and Haiti, on the basis of quotas in effect prior to the allocation of the deficits.

The deficit, its prorations and revised quotas are shown in the table on page 8.

Production area	Change in quota	Basic quota	Temporary quotas and prorations pursuant to Sec. 202 (d) 1/	Deficits and deficit prorations	Total quotas and prorations
		Short tons, raw value			
Domestic beet area		3,215,667			3,215,667

Total		9,332,216	1,467,784		10,800,000

1/ Proration of the quotas withheld from Cuba and Southern Rhodesia.

* Direct-consumption limits in tons: Hawaii - 36,936; Puerto Rico - 162,000
Philippines - 59,920; Panama - 3,817
Ireland - 5,351

OTHER ADMINISTRATIVE ACTIONS

Date announced	Nature of action
May 20, 1969	Announced public hearings on fair prices for the 1969 Louisiana and Florida sugarcane crops, and on whether the wage determinations applicable to field-workers which became effective on October 14, 1968, in Louisiana, and on November 18, 1968, in Florida, should be continued or amended. Places, dates, and local time of hearings are: At Houma, La., on June 26, 1969, in the Municipal Auditorium, 880 Verret Street, beginning at 9:30 a.m.; At Belle Glade, Fla., on July 1, 1969 in the Holiday Inn, beginning at 9:30 a.m. USDA requests that all interested persons appear at the appropriate hearing to present views and pertinent data. (See May 23, 1969 Federal Register).
May 23, 1969	Local producing areas in Louisiana and Florida designated as eligible for abandonment and crop deficiency payments on 1968 crop of sugarcane. (See May 29, 1969 Federal Register).
May 27, 1969	Announced an informal public hearing will be held June 6, 1969, in Miami Beach, Florida, to receive views and recommendations with respect to establishing farm proportionate shares (acreage allotments for the 1970 sugar cane crop in the Mainland Cane Sugar Area (Florida and Louisiana).

Date announced	Nature of action
May 27, 1969 (cont'd)	The hearing will begin at 10 a.m. (EDT) at the Americana Hotel. Views and recommendations of interested persons are desired at the hearing on all matters relating to establishment of proportionate shares. Briefs may be presented at the hearing (in original and 2 copies) or mailed to the Director, Sugar Policy Staff, Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D.C. 20250, so as to be received not later than June 30, 1969. (See May 29, 1969 Federal Register).
May 29, 1969	Announced an informal public hearing will be held beginning on July 23 in San Francisco, California, to receive views and recommendations on whether proportionate shares (farm acreage allotments) should be established for the 1970 crop of sugar-beets in the Domestic Beet Sugar Area. The location of the hearing place and other details together with a proposal for discussion at the hearing will be contained in a press release planned for issuance in early July. Following the issuance of the July press release, notice of the hearing will be filed by publication in the Federal Register.

Date announced	Nature of action
June 17, 1969	Announced revised processor allotments of the 1969 sugar quota for the Mainland Cane Sugar Area totaling 1,169,333 short tons, raw value, to replace the previously established allotments of 1,110,866 tons which have been in effect since April 28 (press release USDA 1279-69). Allotments announced today reflect the total sugar quota established for the area and the use of final production, marketing, and inventory data in the allotment formula. Previous allotments were based in part on estimated data and were limited to 95 percent of the quota. (See June 21, 1969 Federal Register).

STATISTICAL SERIES IN THIS ISSUE

HIGHLIGHTS

1. May 1969 sugar deliveries for continental U. S. consumption 950,000 short tons, raw value (preliminary), up about 132,000 tons from April 1969 and up 19,000 tons from May 1968. January-May 1969 deliveries 3,974,000 short tons, raw value, down 89,000 tons from January-May 1968. Final data for April 1969 deliveries 818,000 short tons, raw value - previously published preliminary as 866,000 tons.

2. Primary distributors' stocks May 31, 1969 were 2,614,000 short tons, raw value (preliminary), up 292,000 tons from a year ago, and down 83,000 tons from April 30, 1969. During May refiners' stocks increased 91,000 tons, beet processors' stocks decreased 131,000 tons, mainland cane processors' stocks decreased by 44,000 tons and importers of direct consumption sugar stocks remained about the same.

3. Charges to quotas January 1 to May 31, 1969 were 4,595,275 short tons, raw value, leaving a balance of 6,204,725 tons to be supplied within the 10,800,000 ton total.

4. Regionally, January-April deliveries, 1969 as compared to 1968 were up in two of the 5 regions: Increases -- New England 3.3 percent, South 0.2 percent - Decreases - North Central 6.3 percent, West 6.1 percent, mid-Atlantic 2.8 percent.

5. First quarter 1969 sugar deliveries were larger to three of the seven industrial user groups than for the same 1968 quarter, and also larger to two of the four non-industrial user groups. To industrial buyers the national decrease was 3.5 percent while non-industrial buyers decreased 5.4 percent.

Table 1.- Sugar supply and disposition by primary distributors, January-April 1969

(Short tons, raw value)

1/ Spot prices are for bulk sugar under Contract No. 10 which, beginning November 21, 1966, replaces Contract No. 7. The terms of these contracts are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 10 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81 January 1959, pages 5 to 9.

1/ Gross basis price in 100-pound bags subject to a 2 percent discount.

2/ Hydrate, commercial bags less than carlots, ex whse., N.Y. 100 lbs. Beginning April 1964 price is for 600 bag carload f.o.b. N.Y.

3/ For regular conversion sirup (38-49 D.E.) per cwt. in tank cars f.o.b. New York, except February 1962 to April 1964 price is for drums in less than carlots. Quoted as 42° Baume unmixed, except beginning March 1956, quoted as 43° unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.
